

Are you prepared for the AI transformation?

CDM & Juniper Networks can bring your organisation into the 21st century with the future of networks.

- The wi-fi is terrible
- The Internet is down
- My application is slow

As organisations grow, the difference between a successful IT infrastructure and an ‘available’ network becomes more palpable.

The AI-Driven Enterprise

But first, what is Artificial Intelligence (AI)? AI is the automation of tasks that require human cognition.

JUNIPER PROVIDES A COMPLETE CLIENT-TO-CLOUD ENTERPRISE SOLUTION THAT ENCOMPASSES THREE ASPECTS:

Juniper Wired Access Solution

- Zero-Touch Provisioning
- Proactive Troubleshooting and
- Self-Driving Automation for Ongoing Operational Simplicity

Juniper Wireless Access Solution

- Agility and Reliability of the microservices cloud allows Juniper to deliver optimized experiences and simplified Network Operations.
- Now, IT Teams can streamline operations while delivering innovating and strategic projects with IoT and locations services that boost user engagement

Wired & Wireless access

SD-WAN

- Software-based solution
- Achieve cost savings of up to 75% versus competitor solutions
- Session Smart Routing which provides advanced visibility and analytics

Mist AI

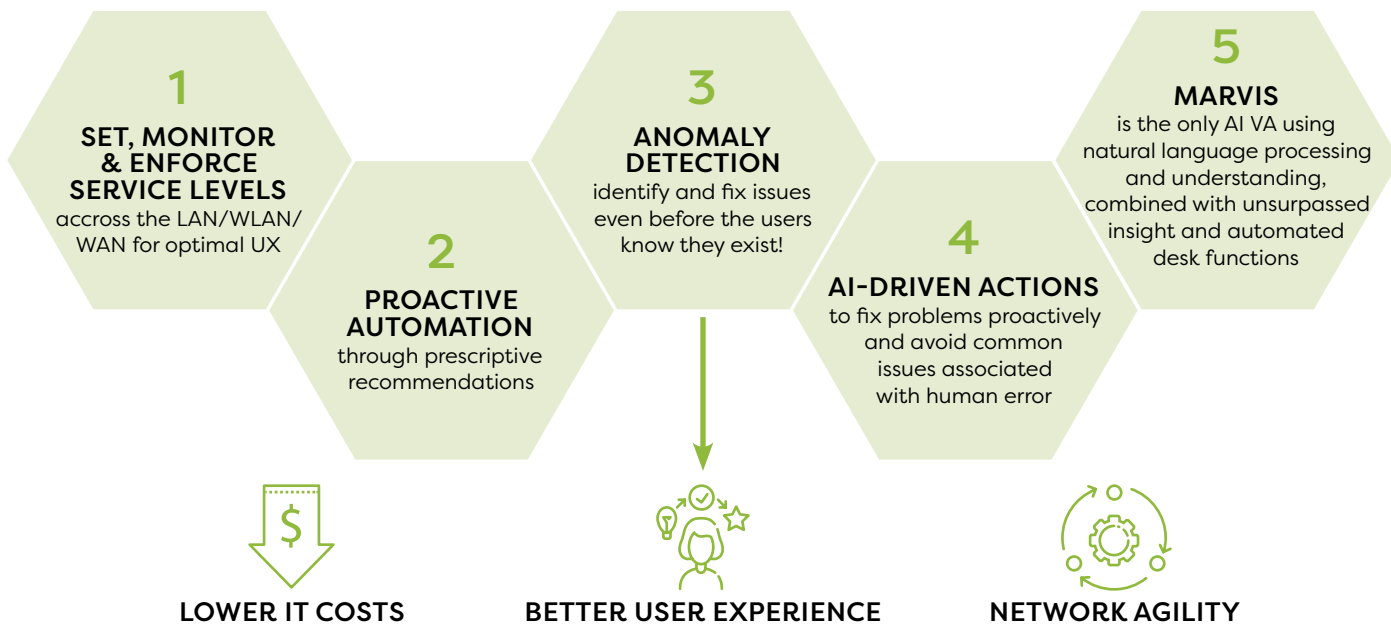

- Enable Simple Operations
- Rapid Mean Time to Repair
- The best visibility into the network

User experience comes first

Juniper Mist Wired Assurance allows IT Teams to streamline operations and deliver a new generation of experience-first networks.

Why choose the AI-Driven Enterprise?

For assured network experiences you need visibility of every user, every device, and every application.

Meet Marvis

Your Virtual Network Assistant

Solving problems before they happen!

- Natural language processing
- Conversational interface
- Prescriptive actions
- Self-driving network operations
- Streamlined operations
- Optimised user experience

Gartner names Juniper a Leader in the 2021 Gartner Magic Quadrant Gartner® Magic Quadrant™ for Enterprise Wired and Wireless #LAN Infrastructure

What are the challenges related to AI adoption?

CDM is an Australian-owned company providing the full spectrum of ICT services, from consulting to delivering and managing your ICT needs. We create relationships focused on achieving your business outcomes, creating value and maximising your return on investment.
